PROFESSIONAL PROFILE

Third-year Computer Science student with a solid foundation in programming, databases, and full-stack web development (frontend and backend). I have built real projects with Laravel, Node.js, PostgreSQL, and Docker. I am seeking a technology internship where I can contribute while continuing to learn.

EDUCATION

B.S. in Computer Science Engineering 2024 - 2028 (in progress)
Universidad de Especialidades Espíritu Santo (UEES) - Samborondon, Ecuador. Currently in sixth semester.
Relevant coursework: Object-Oriented Programming, Data Structures, Databases I and II, Networks and Communications, Operating Systems.

FEATURED PROJECTS

RPG Game Simulator with Laravel and Prolog - Individual

- Web application that combines a Laravel interface with a Prolog knowledge base to manage game logic: characters, missions, combat, inventory, and experience.

Technologies: Laravel, PHP, Blade, SWI-Prolog, Bootstrap. View repository

Distributed Inventory System - Collaborative

- Developed the inventory management application (product CRUD), connected to PostgreSQL through a private Tailscale network and deployed in Docker containers.

Technologies: Node.js, Express, PostgreSQL, Docker, Docker Compose, EJS, Tailwind CSS. View repository

TeamUp UEES - Extracurricular Activities Platform - Collaborative

- Web platform for managing university activities, clubs, and competitions. I developed the home and academic activity publishing modules.

Technologies: PHP, Laravel, MySQL, Bootstrap. View repository

TECHNICAL SKILLS

Backend: PHP, Laravel, Node.js, Express, Prolog Databases: MySQL, PostgreSQL
Web (Frontend): JavaScript, HTML, CSS, Bootstrap, Tailwind Tools: Docker, Docker Compose, Git, GitHub
CSS

CERTIFICATIONS AND COURSES

- Generative Artificial Intelligence Applied to Digital Transformation - MIT Professional Education, 2026.
- AWS Academy Data Engineering - Training badge, 40 hours.
- ECCE - Certificate of Competency in English (B2) - Michigan Language Assessment / Cambridge English, 2023.
- SpaceHACK for Sustainability 2025 - Participation in a global hackathon focused on sustainability, data, and satellite technology.

LANGUAGES

English: B2 (upper-intermediate). Spanish: native language.

SOFT SKILLS

Teamwork · Fast learning · Organization · Responsibility · Problem solving
